Docket No. 50-397

U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D.C. 20555

Gentlemen:

Subject: **WNP-2, OPERATING LICENSE NPF-21
SCHEDULE CHANGE FOR RESOLUTION -
GENERIC LETTER 92-08, THERMO-LAG 330-1 FIRE BARRIERS**

- References:
- 1) Letter GI2-95-180, dated August 10, 1995, JW Clifford (NRC) to JV Parrish (SS), "Completion of Generic Action for Generic Letter 92-08, Thermo-Lag 330-1 Fire Barriers for the Washington Public Power Supply System (WPPSS) Nuclear Project No. 2 (WNP-2) (TAC No. M85624)"
 - 2) Letter G02-95-082, dated April 27, 1995, JV Parrish (SS) to NRC, "Plan for Resolution of Thermo-Lag 330-1 Concerns"
 - 3) Letter G02-92-179, dated July 28, 1992, GC Sorenson (SS) to NRC, "Response to IE Bulletin 92-01"
 - 4) Letter G02-92-228, dated September 28, 1992, GC Sorenson (SS) to NRC, "Response to IE Bulletin 92-01, Supplement 1"

Reference 1 determined that the information requested from WNP-2 by Generic Letter 92-08 was complete, except for an assessment of the ampacity impact of previously installed Thermo-Lag material on cable life of safety-related circuits, and requested notification if the schedule or plans for resolution outlined in Reference 2 were to change.

The plans to change plant design to protect safe shutdown capability without reliance on Thermo-Lag 330-1 will be implemented as indicated in Reference 2. However, the schedule has been updated to reflect recent changes in methodology, available fire barrier materials, and a levelization of available resources.

Dear Mr. [Name] [Address] [City] [State] [Zip]

I am writing to you today to inform you of the results of the [Project Name] [Project Description] [Project Results]

The [Project Name] has been completed and the results are as follows: [Project Results]

I am sure that you will find these results to be of interest and value. I am sure that you will find these results to be of interest and value.

I am sure that you will find these results to be of interest and value. I am sure that you will find these results to be of interest and value.

Page 2

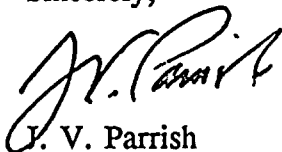

GENERIC LETTER 92-08, THERMO-LAG 330-1 FIRE BARRIERS

The revised schedule extends the program by two years. Physical plant changes will be initiated in 1997/1998 and completed in the Spring 1999 outage, with administrative closeout to follow. A two year change is necessary because annual outages are planned such that only one electrical division is significantly affected in a given year. The majority of the modifications are associated with Division 2 which is scheduled for 1997 and not again until 1999. Consequently, the planned work cannot be completed until 1999.

This delay has no adverse effect on the ability to safely shutdown the reactor and maintain it in a shutdown condition because fire tours, initiated in 1992 as stated in References 3 and 4, will continue to be performed as compensatory measures until the necessary changes are effected.

Should you have any questions or desire additional information regarding this matter, please call me or Ms. Lourdes Fernandez at (509) 377-4147.

Sincerely,

J. V. Parrish
Chief Executive Officer
