Gentlemen:

Subject: **WNP-2 OPERATING LICENSE NPF-21
FITNESS FOR DUTY SEMIANNUAL PERFORMANCE DATA REPORT
JANUARY 1, 1996, TO JUNE 30, 1996**

Pursuant to 10 CFR 26.71(d), enclosed is the Washington Public Power Supply System's Fitness for Duty Semiannual Performance Data report for January 1, 1996, to June 30, 1996. The data has been analyzed and management actions have been taken to enhance the FFD program.

Should you have any questions or desire additional information regarding this matter, please call me or D. W. Martin, Manager, Security Programs at (509) 377-8628.

Respectfully,

R. L. Webring For

NUCLEAR PLANT NO. 2
PERFORMANCE DATA REPORT

January 1 to June 30, 1996

FITNESS FOR DUTY PROGRAM SUMMARY:

During this reporting period, approximately 28.5 percent of the population eligible for random selection have been randomly tested. The rate of positive from random testing is 0.04 percent.

POSITIVE RESULTS:

Twenty-two chemical tests yielded positive results during this reporting period. Calculated from an historical perspective, positives recorded from January 1990 until June 1996, show that marijuana remains the drug of preference, accounting for 58 percent of all the positive results. Cocaine is second with 21 percent of positive results.

MANAGEMENT ACTIONS:

Pre-Access

Access was denied for four employees and fourteen short-term contractor employees that tested positive on pre-access analysis. Management was notified and the individual's files were annotated of the positive result and management's actions.

Refusal To Test

Access was denied for one employee and one short-term contractor for refusal to test for pre-access. Both were terminated for cause. Management was notified and the individual's files were annotated of the refusal to test and termination for cause.

Random

Two short-term contractor employees who tested positive during random testing had their access removed for a minimum of fourteen days. Management was notified and their files were annotated of the positive results and management's actions.

NUCLEAR PLANT NO. 2
PERFORMANCE DATA REPORT
January 1 to June 30, 1996

Follow-Up

One short-term contractor employee, participating in the follow-up program, tested positive during follow-up testing and had their access removed for three years. Management was notified and the individual's file was annotated of the positive result and termination for cause. Presently, there are two employees participating in the follow-up program.

ADMINISTRATIVE ACTIONS:

Two short-term contractors with unescorted access privileges were temporarily suspended, pending confirmation of the tests results. One individual initially tested positive by on-site EMIT testing for marijuana during random testing. The sample confirmed positive and the individual was denied access to the Protected Area of WNP-2 for fourteen days and referred to treatment. Subsequent to the fourteen day access denial, this individual's employment was terminated. The other short term contractor tested positive during a follow-up test for cocaine. The sample confirmed positive and the individual was denied access to the Protected Area of WNP-2 for three years and employment was terminated.

EVENTS REPORTED TO THE NUCLEAR REGULATORY COMMISSION (NRC):

During this reporting period, there were no violations of the Fitness for Duty program that were reportable.

PROGRAM WEAKNESSES:

During this reporting period, no program weaknesses were identified.
