Docket No. 50-397

U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, DC 20555

Gentlemen:

Subject: **WNP-2, OPERATING LICENSE NPF-21
REVISION 25 TO OPERATIONAL QUALITY ASSURANCE
PROGRAM DESCRIPTION (WPPSS-QA-004)**

In accordance with 10 CFR 50.54(a)(3), the Supply System is revising the U.S. Nuclear Regulatory Commission (NRC) approved topical report, "Operational Quality Assurance Program Description (WPPSS-QA-004)." The changes made in this revision do not reduce commitments in the program description as previously accepted by the NRC.

This change partly implements the Improved Technical Specifications for WNP-2 previously approved by the NRC. The changes incorporated in Revision 25 involve moving selected Section 6.0 requirements of the WNP-2 Technical Specifications into the Operational Quality Assurance Program Description. The information moved from Section 6.0 of the Technical Specification was moved verbatim, except for editorial changes to correct paragraph numbers, organization titles, or position titles.

In addition, the responsibility for Nuclear Safety Issues Program has been moved from the Quality Organization to the Vice President, Operations Support/PIO. No requirements were changed. These changes do not reduce commitments made in the previous revisions of the Operational Quality Assurance Program Description, reduce QA/QC independence, or result in changes to the Technical Specifications. Vertical lines have been placed in the right-hand margin to identify text changes, additions, and deletions. A summary of changes is also provided to aid in your review.
