Mr. Thomas Novak
Assistant Director of Licensing
Division of Licensing
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Subject: Palo Verde Nuclear Generating Station
(PVNGS) Units 1, 2 and 3
Docket No. STN-50/528/529/530
File: 82-056-026; G.1.01.10

Reference: NUREG-0857, "Safety Evaluation Report" related to the
Operation of Palo Verde Nuclear Generating Station
Units 1, 2 and 3 dated November, 1981.

Dear Mr. Novak:

Section 2.4.2.1 (page 2-14) of the referenced document states "...the applicant has committed and the staff will confirm, that, prior to fuel loading for Unit 1, either: (1) the road crossing on East Wash will be removed, (2) a low water crossing will be installed, or (3) the East Wash embankment will be raised and the road profile will be modified to maintain an adequate cross-sectional flow area to pass the PMF with two feet of freeboard on the East Wash dike".

In response to this item, APS intends to raise the East Wash dike and the access road as shown. On attached drawings 13-C-ZVC-066, Revision 4 and 13-C-ZVC-100, Revision 3 (Section Views F and G). We believe this modification, which includes the two feet of freeboard, will prevent over topping the dike due to a PMF and thus resolve the staffs concern.

We would appreciate your prompt review of this information so we may proceed with this work.

Please contact me if you have any questions.

Very truly yours,

E. E. Van Brunt, Jr.
APS Vice President,
Nuclear Projects
ANPP Project Director
