SUBJECT: NRC I & E Operations Quality Assurance Program Implementation  
Inspection Prior to Operating License

Inspection report 50-528/83-06 (April 5, 1983) requested that APS provide the NRC a proposed and alternate one week period for conducting the Operations Quality Assurance Program Inspection and identify any portions of this program which will not be implemented by the proposed date.

We would like to request an extension to June 15, 1983, for our response to the NRC in order to review our schedule and more thoroughly evaluate our situation.

Should you have any questions or concerns, please contact Mr. S. R. Frost at 602-271-3348.

Sincerely,

G. Carl Andognini  
Vice President, Nuclear  
Operations
