1. The first step in the process of identifying a problem is to determine the nature of the problem. This involves a thorough understanding of the situation and the factors that may be contributing to the problem. Once the nature of the problem is understood, the next step is to identify the causes of the problem. This involves a detailed analysis of the situation and the factors that may be contributing to the problem. Once the causes of the problem are identified, the next step is to develop a plan of action to address the problem. This involves determining the steps that need to be taken to address the problem and the resources that will be needed to implement the plan. Once a plan of action has been developed, the next step is to implement the plan. This involves carrying out the steps that have been identified in the plan of action. Finally, the last step in the process is to evaluate the results of the plan. This involves determining whether the plan has been successful in addressing the problem and whether any adjustments need to be made.

Attention: Mr. G. W. Knighton
Chief, Licensing Branch No. 3

Subject: Palo Verde Nuclear Generating Station
(PVNGS) Docket Nos. STN-50-528/529/530
File: 83-056-026; G.1.01.10

Reference: Letter from G. W. Knighton, NRC to E. E. Van Brunt, Jr., APS
dated February 3, 1983

Dear Sir:

The referenced letter requested a schedule for responding to five confirmatory items for which additional information is required to complete the review of the PVORT audit. In addition, a schedule for the completion of the qualification program for the safety related pumps and valves was requested.

We plan to respond to these items by June 30, 1983.

Very truly yours,

E. E. Van Brunt, Jr.
APS Vice President,
Nuclear Projects
ANPP Project Director
