Confirmatory Issues 1 and 2

Dear Mr. Knighton:

As discussed in the referenced letter the CESSAR design is being modified. A redundant 2-inch fail-closed diaphragm valve is to be installed upstream of CH-PDV-240 in the charging line. The valve and controls will be installed, and the valve tested and operable prior to PVNGS Unit I fuel load.

Accordingly, Units II and III will also be modified prior to their respective fuel loads.

If you should have any questions, please contact me.

Very truly yours,
