Subject: Certification of the Operability of All Required Systems  
for Initial Fuel Load, Palo Verde Unit 1  
File: 85-055-026

Re: PVNGS Unit 1 Operating License NPF-34

Dear Mr. Martin:

As required by Item 1.b. of Attachment 1 to the Palo Verde Nuclear Generating Unit 1 Operating License, NPF-34, I am hereby certifying that Item 1.a of Attachment 1 to the license has been completed for the initial fuel load of Unit 1.

The operability of all systems required for the initial fuel load has been demonstrated by successfully meeting the acceptance criteria in the PVNGS Technical Specifications. This has been accomplished by the completion of the applicable surveillance tests or by preoperational testing which verifies the meeting requirements of the Technical Specifications and which were performed within the required surveillance interval.

Very truly yours,

E. E. Van Brunt, Jr.
