## Arizona Nuclear Power Project

P.O. BOX 52034 • PHOENIX, ARIZONA 85072-2034

Director of Nuclear Reactor Regulation  
Mr. George W. Knighton, Chief  
Licensing Branch No. 3  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

ANPP-32731-EEVB/WFQ  
May 24, 1985

Subject: Palo Verde Nuclear Generating Station (PVNGS)  
Units 1, 2, and 3  
Docket Nos. STN 50-528 (License No. NPF-34)/529/530  
Compliance with the Emergency Planning Statement of Policy,  
50 Federal Register 20882, May 21, 1985  
File: 85-004-419.06

Dear Mr. Knighton:

The referenced Emergency Planning Statement of Policy was issued by guidance to the Staff in uncontested cases in connection with the issuance of full power operating licenses. Such guidance provides that the Staff in uncontested cases "may find that applicants who have met the requirements of [Section] 50.47(b)(12) as interpreted by the Commission before the GUARD decision and who commit to full compliance with the Commission's response to the GUARD remand meet the requirements of [Section] 50.47(c)(1) and therefore are entitled to license conditioned on full compliance with the Commission's response to the GUARD remand."

Emergency planning for the Palo Verde Nuclear Generating Station (PVNGS) complies with the Commission's interpretation of [Section] 50.47(b)(12) prior to the GUARD decision requiring the listing of area medical facilities capable of treating off-site members of the public who are seriously irradiated. Such listing of area medical facilities is found in the "Fixed Nuclear Facility Off-Site Emergency Response Plan" of the State of Arizona and the County of Maricopa, pages D-10-1 through D-10-3, D-10-C-1 and D-10-D-1 (copies attached) which has been approved by FEMA. The capability of the listed facilities is established by accreditation pursuant to the Joint Commission on Hospital Accreditation Manual (1985 Edition), Emergency Services Section, pages 23-24.

Applicant Arizona Public Service Company (APS) hereby commits to fully comply with the Commission's response to the GUARD remand to the extent that such compliance is within the control of APS. To the extent that full compliance is dependent upon action required to be taken by state and/or local governmental agencies or other entities over which APS has to control, APS commits to use its best efforts to secure compliance by such agencies or entities.

1. The first part of the document is a list of names and addresses. The names are: John Doe, Jane Doe, and John Doe. The addresses are: 123 Main St, 456 Main St, and 789 Main St.

2. The second part of the document is a list of names and addresses. The names are: John Doe, Jane Doe, and John Doe. The addresses are: 123 Main St, 456 Main St, and 789 Main St.

3. The third part of the document is a list of names and addresses. The names are: John Doe, Jane Doe, and John Doe. The addresses are: 123 Main St, 456 Main St, and 789 Main St.

4. The fourth part of the document is a list of names and addresses. The names are: John Doe, Jane Doe, and John Doe. The addresses are: 123 Main St, 456 Main St, and 789 Main St.

5. The fifth part of the document is a list of names and addresses. The names are: John Doe, Jane Doe, and John Doe. The addresses are: 123 Main St, 456 Main St, and 789 Main St.

6. The sixth part of the document is a list of names and addresses. The names are: John Doe, Jane Doe, and John Doe. The addresses are: 123 Main St, 456 Main St, and 789 Main St.

7. The seventh part of the document is a list of names and addresses. The names are: John Doe, Jane Doe, and John Doe. The addresses are: 123 Main St, 456 Main St, and 789 Main St.

8. The eighth part of the document is a list of names and addresses. The names are: John Doe, Jane Doe, and John Doe. The addresses are: 123 Main St, 456 Main St, and 789 Main St.

Mr. George W. Knighton,  
Palo Verde Nuclear Generating Station Units 1, 2, and 3  
Compliance with the Emergency Planning Statement of Policy, 50 Federal  
Register 20882, May 21, 1985  
Page 2

On basis of the foregoing, APS requests the staff to make the findings authorized by the referenced Emergency Planning Statement of Policy, including without limitation, the finding that APS is entitled to licenses for PVNGS Units 1, 2 and 3 conditioned on full compliance with the Commission's response to the GUARD remand.

Very truly yours,

A handwritten signature in dark ink, appearing to read "E. E. Van Brunt, Jr.", with a stylized flourish at the end.

## APPENDIX 10: OFFSITE EMERGENCY MEDICAL RESPONSE

## I. CONCEPT

## A. General

1. Patients, especially trauma and/or burn victims whose injuries have been complicated as a result of contamination by radioactive materials, are in need of special consideration to minimize the effects.
2. An additional concern is the necessity to limit the spread of contamination during patient stabilization and transfer.
3. In order to mitigate radiation effects to reduce morbidity and mortality, it is necessary to integrate and coordinate the capabilities of a number of public and private agencies.

## B. Governmental Organization and Tasks

1. The Arizona Department of Health Services (DHS) is the agency having overall responsibility for the establishment, administration and coordination of a statewide system of emergency medical services (EMS). As lead agency the DHS will coordinate EMS activities with the Maricopa County Department of Health Services, and the Radiological Emergency Assistance Team (REAT) of the Arizona Radiation Regulatory Agency (ARRA) as well as the Operations Directorate to ensure the provision of appropriate emergency medical services. By agreement, onsite assistance is rendered by specific emergency resource agencies at the direct request of the nuclear facility. Other governmental entities are to respond to emergencies occurring offsite only when a specific request for resources is received from the facility in connection with notification follow-up.

See Appendix 1 - Organizational Alert to Annex C, Direction and Control.

C. Facilities Resources

1. The primary treatment center for the planning area will be the Maryvale Samaritan Hospital. The West Valley Emergency Center will serve as the support facility. These treatment centers have also been designated by the nuclear facility as receiving centers for patients injured onsite, and both have been found to have more than adequate staff and support elements to treat the special needs of affected patients.
2. There are a number of additional facilities, including the Luke Air Force Base Hospital located 30 miles from the plant, which has the capability to treat contaminated patients. Additional hospitals have adequately trained personnel and are willing to accept patients who have been contaminated by radioactive materials. (See Tab C.)

D. Transportation Resources

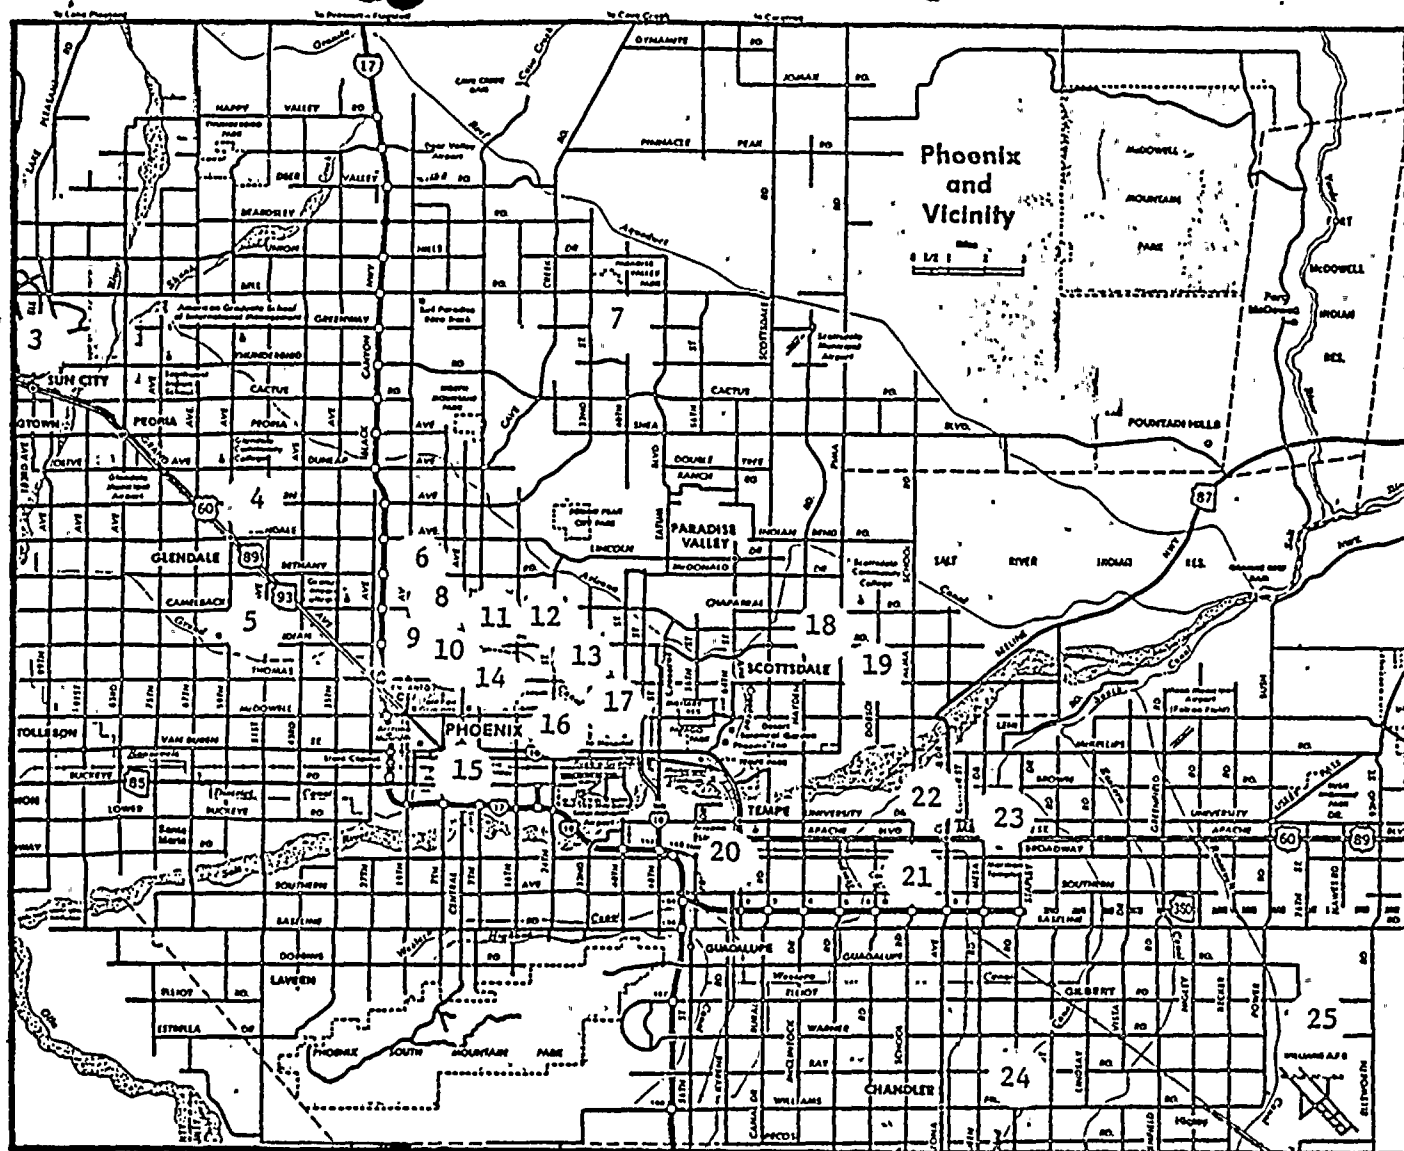

1. The Arizona Nuclear Power Project, through its operating agency, Arizona Public Service Company, has agreed to provide the support if available, of the ambulance unit used onsite. State regulations restrict the transport of patients by an industrial ambulance except in a life or death situation. The nearest available ground ambulance in the area at this time is a volunteer service located in Buckeye (17 miles) and a commercial unit operating from Litchfield Park (30 miles). In addition, a number of private air ambulances and the Arizona Department of Public Safety (fixed wing and helicopters) are

available within a relatively short period of time for transportation and also provide, as a minimum, paramedic services. These transport personnel will receive appropriate training to deal with radiation victims. The Arizona Department of Public Safety is in the process of installing a microwave system (Emergency Medical Services Communications System - EMSCOM) which will allow a physician in the base hospital to communicate with the Emergency Medical Technician either at the scene or enroute. Provision is also being made to ultimately provide a telemetry capability. The City of Phoenix Fire Department continues to be instrumental in providing on-line communications from its dispatch center. In this case as the ambulance unit approaches the Phoenix area, the communications traffic is coordinated by the Phoenix Fire Department.
