Vital Equipment Analysis
File: 85-056-026; G.1.01.10; 85-001-493

Reference: (1) Letter to E. E. Van Brunt, Jr. (ANPP) from J. L. Montgomery,
(USNRC Region V), dated April 2, 1985; regarding a visit of Los
Alamos National Laboratory representatives to PVNGS

Dear Mr. Montgomery:

Your letter of April 2, 1985, (Reference 1) requested specific dates for a visit by representatives of Los Alamos National Laboratory (LANL) to the Palo Verde Nuclear Generating Station for the purpose of identifying those areas and combinations of areas at PVNGS in which sabotage actions could result in radiological releases in excess of 10 CFR part 100.

We have determined that the week of June 17, 1985 would be suitable and have discussed this with Mr. Doug Schuster of your office.

We will make available to the LANL site team a knowledgeable individual from our operations department as well as copies of those drawings necessary for the completion of their work.

If you have any further questions or if I can be of any further assistance, please contact me.

Very truly yours,

E. E. Van Brunt, Jr.
Executive Vice President
Project Director
