(3) Letter to J. Martin, USNRC Region V, from E. E. Van Brunt, Jr., dated June 6, 1985 (ANPP-32780). Notification of Entry into Mode 1 for PVNGS Unit 1.

Dear Mr. Knighton:

Reference (1), Section 1.11, page 1-3, Item (4) states:

"Prior to exceeding 5% of full power, the post accident sampling system will be operable (ANPP Letter 32695, dated May 22, 1985)."

We wish to inform you that we have completed modifications, testing and have made operable a PASS which meets the provisions of NUREG-0737, Item II.B.3. The primary method for performing Post Accident Sampling is the remote grab sampling capability as described in Reference (2).

PASS was declared operational prior to initial entry into Mode 1. PVNGS Mode 1 entry occurred on June 6, 1985 and the USNRC Region V was notified of this per Reference (3).

By submittal of this information we have closed out the above stated SER issue. If you have any questions on this subject, please contact William F. Quinn of my staff at extension 4087.
