1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator who is assigned to the case. The investigator must first determine the nature of the problem and the scope of the investigation. This is done by reviewing the available information and by conducting interviews with the relevant parties. The investigator must also determine the objectives of the investigation and the methods to be used to achieve these objectives.

Emergency Plan Implementing Procedure Update
File: 85-056-026; 85-002-493

Dear Mr. Martin:

Arizona Public Service Company, as Project Manager and Operating Agent for Palo Verde Nuclear Generating Station Units 1, 2, and 3, is submitting herewith, pursuant to 10 CFR 50, Appendix E, updated information in the form of Copy No. 8-8 of implementing procedures for the Emergency Plan. The revisions made to the existing procedures affect Emergency Plan Implementing Procedures (EPIP's) 03, 04, 05, 06, 38, and 56, as well as the Index.

In accordance with Generic Letter 81-27, certain EPIP's have been marked to indicate information considered privacy or proprietary (including names, home telephone numbers, and internal and external telephone numbers that must remain available during an emergency). The specific information considered privacy or proprietary has been set off by brackets in the following EPIP's and respective pages:

<u>EPIP No.</u>	<u>Page No.</u>
