Dear Sir:

Enclosed please find one signed copy of Amendment to Indemnity Agreement No. B-95, Amendment No. 6, between Arizona Public Service Company, Salt River Project Agricultural Improvement and Power District, El Paso Electric Company, Los Angeles Department of Water and Power, Southern California Edison Company, Public Service Company of New Mexico, Southern California Public Power Authority, and the U.S. Nuclear Regulatory Commission for your review and files.

Should you have any questions, please contact me.

Very truly yours,

E. E. Van Brunt, Jr.  
Executive Vice President  
Project Director

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

Docket Nos. 50-528  
50-529  
70-3022

AMENDMENT TO INDEMNITY AGREEMENT NO. B-95  
AMENDMENT NO. 6

Effective **JAN 22 1986**, Indemnity Agreement No. B-95, between Arizona Public Service Company, Southern California Edison Company, Salt River Project Agricultural Improvement and Power District, Public Service Company of New Mexico, El Paso Electric Company, Southern California Public Power Authority, Los Angeles Department of Water and Power \* and the Nuclear Regulatory Commission, dated January 26, 1983, as amended, is hereby further amended as follows:

Item 3 of the Attachment to the indemnity agreement is deleted in its entirety and the following substituted therefor:

Item 3 - License number or numbers

SNM - 1887	(From 12:01 a.m., January 26, 1983, to 12:00 midnight, December 30, 1984 inclusive)
SNM - 1922	(From 12:01 a.m., December 19, 1983, to 12:00 midnight, December 8, 1985 inclusive)
SNM - 1956	(From 12:01 a.m., <b>JAN 22 1986</b> )
NPF - 34	(From 12:01 a.m., December 31, 1984, to 12:00 midnight, May 31, 1985 inclusive)
NPF - 41	(From 12:01 a.m., June 1, 1985)

\*Los Angeles Department of Water and Power will become a party to the Indemnity Agreement on and after the date when it acquires an ownership interest in the facilities described in Facility Operating Licenses NPF-41 and NPF-46.

*[Illegible handwritten notes]*

Figure 6 shows the effect of the initial concentration of the monomer on the polymerization rate. The reaction rate increases with increasing initial concentration of the monomer. This is due to the fact that the higher the initial concentration of the monomer, the more active species are present in the system.

[illegible]

1. The first group of people who are interested in the results of the study are the researchers themselves. They want to know if the study was successful in achieving its objectives and if the results are consistent with their expectations. They also want to know if the study was conducted in a rigorous and unbiased manner.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The number of transformed cells was determined by the number of colonies obtained on the selective medium. The results are the mean of three independent experiments. Error bars represent the standard deviation.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were grown in the YEA medium at 28°C for 24 h. The cell concentration of the strains was adjusted to 10<sup>8</sup> cells/ml. The cell suspension was mixed with the plant tissue and incubated for 24 h. The plant tissue was then cultured on the selective medium. The transformation efficiency was calculated as the number of transformants per 100 mg of plant tissue. The data were the mean of three independent experiments.

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion. The number of people aged 65 and over is expected to increase from 250 million to 450 million. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion.

Figure 1. The study area. The map shows the location of the study area in the north-east of Iran. The map also shows the location of the study area in the north-east of Iran. The map also shows the location of the study area in the north-east of Iran.
