Docket No. STN 50-529 (License NPF-51)  
Cancellation of Request for Emergency Technical Specification Change  
File: 86-F-005-419.05; 86-056-026

- References: A. Letter from E. E. Van Brunt, Jr., ANPP to G. W. Knighton, NRC, dated May 27, 1986 (ANPP-36693).
- B. Letter from F. Schroeder, Deputy Director Division of PWR Licensing - B, NRC, to E. E. Van Brunt, Jr., ANPP, dated May 28, 1986.
- C. Letter from E. E. Van Brunt, Jr., ANPP, to G. W. Knighton, NRC, dated May 28, 1986 (ANPP-36699).

Dear Mr. Knighton:

In reference A, ANPP requested 48 hour relief from Limiting Condition for Operation 3.0.3 while a proposed Emergency Technical Specification change was prepared and submitted for your review and approval (Reference C). The relief was necessary to allow PVNGS Unit 1 and 2 to remain at power during this period. Concurrent with the Emergency Technical Specification Change request, PVNGS operations planned and subsequently implemented corrective actions. The corrective actions involved re-calibration of the low reactor coolant flow trip setpoints based on the range of full flow differential pressures observed in the units. The Technical Specifications limit listed in Table 2.2-1 are not affected by the re-calibration of the setpoints.

The re-calibrated setpoints were set into the units which resulted in the correction of previous channel trips and pre-trips. On May 29, 1986, at 0250 MST, Unit 2 declared all channels operable and at 1430 MST, of the same day, Unit 1 declared all channels operable.

Based on this new information and on a telephone conversation between ANPP and members of your staff, on May 29, 1986, ANPP requests that the NRC cancel our request for an Emergency Technical Specification change as delineated in reference C.
