FLORIDA POWER & LIGHT COMPANY

December 10, 1982

L-82-537

Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Eisenhut:

Re: St. Lucie Unit 1
Docket No. 50-335
Proposed License Amendment
Adequacy of Station Electrical Distribution

In accordance with 10 CF 50.30, Florida Power & Light Company submits herewith three signed originals and forty copies of a request to amend Appendix A of Facility Operating License DPR-67.

This amendment is submitted as requested by the NRC to provide Technical Specifications on undervoltage relays for degraded grid conditions.

The specifications marked with an asterisk deal with the additional relays on the 4.16KV and 480V busses which will be added. These specifications should not apply to these relays until the plant change/modifications to install the relays are complete.

The proposed amendment is described below.

Page 3/4 3-15

Table 3.3.4 is modified to add time delay settings to the loss of voltage trip setpoint and to add specifications for degraded voltage trip setpoints.

Page 3/4 3-19

Table 4.3-2 is modified to add surveillance requirements for additional undervoltage relays.

Pages 3/4 3-11, 3-13

Table 3.3-3 is modified to require a minimum number of channels to be operable for undervoltage relays and to add the applicable actions statement.
