Proposed Technical Specification Change -
Snubber Visual Inspections
File: 87-F-056-026; 87-F-005-419.05

Reference: (1) Letter from J. G. Haynes, ANPP, to G. W. Knighton, NRC, dated December 26, 1986 (ANPP-39507). Subject: Proposed Technical Specification Change - Snubber Visual Inspections.

Dear Sirs:

By Reference (1), ANPP requested a change to the PVNGS Unit 2 Technical Specifications to revise Surveillance Requirement 4.7.9.b to postpone the first inservice visual inspection of 25 snubbers in the containment spray system until the first refueling outage. Subsequent to the submittal of this request, ANPP decided to perform the visual inspection of these 25 snubbers during the PVNGS Unit 2 planned outage conducted in January and February of 1987, and the NRC Staff was verbally informed of this decision. This negated the need for the Technical Specification change. This letter is provided to formally notify the NRC Staff that the proposed Technical Specification change of Reference (1) is no longer needed. ANPP requests that the NRC Staff discontinue the processing of this Technical Specification change.

If you have any additional questions on this matter, please contact Mr. W. F. Quinn of my staff.

Very truly yours,

J. G. Haynes
