Document Control Desk
U. S. Nuclear Regulatory Commission
Mail Station Pl-137
Washington, D.C. 20555

References: A) NRC Inspection Report from J. B. Martin, NRC to E. E. Van Brunt, Jr., ANPP, dated March 30, 1988. Subject: Safety System Functional Inspection (SSFI)

B) Letter from E. E. Van Brunt, Jr., ANPP to NRC Document Control Desk 102-00725, dated April 25, 1988. Subject: Response to Notice of Violations from SSFI Inspection

Dear Sirs:

Subject: Palo Verde Nuclear Generating Station (PVNGS)
Units 1, 2, and 3
SSFI Diesel Generator (DG) and Auxiliary Feedwater (AF)
Systems Review
File: 88-056-026; 88-070-026

ANPP's initial response to the Notice of Violation from the SSFI Inspection was provided to the NRC by Reference (B). In this initial response, ANPP committed to provide a detailed review of two selected safety-related systems, DG and AF by December 1988.

Since the submittal of Reference (B) on April 25, 1988, we have instituted a major program within the Nuclear Engineering Department. The Engineering Excellence Program is composed of fourteen (14) major objectives. One objective specifically addresses systems reviews and training for the Nuclear Engineering Department staff. In preparation to commence the first system reviews, it was necessary to develop standards for the system reviews, calculations reviews, training packages, Design Basis Manual Writers Guides and formats, etc. We plan to commence the system reviews immediately following this effort and anticipate a four (4) month duration for these initial systems to be reviewed.

11.2

161-01405-DBK/JMQ
October 19, 1988

We have combined the the AF and DG systems reviews with the training effort that is now scheduled to be completed by February 28, 1989. Therefore, completion of the AF and DG systems review will be completed by February 28, 1989.

If you have any questions, please contact A. C. Rogers and T. D. Shriver of my staff.

Very truly yours,

D. B. Karner
Executive Vice President
