## Arizona Nuclear Power Project

P.O. BOX 52034 • PHOENIX, ARIZONA 85072-2034

161-01546-DBK/PGN  
December 14, 1988

Docket No. STN 50-530

Document Control Desk  
U.S. Nuclear Regulatory Commission  
Mail Station P1-137  
Washington, D.C. 20555

Dear Sirs:

Subject: Palo Verde Nuclear Generating Station (PVNGS)  
Unit 3  
Proposed Reload Technical Specification Changes  
File: 88-F-005-419.05; 88-D-056-026

Attached please find proposed changes to the PVNGS Unit 3 Technical Specifications. These changes are a result of the upcoming reload. To facilitate the review, an index of the changes has been included. The attachments have been ranked in the order that review and approval is needed. The due dates are based on the current outage schedule and reflect the date when Unit 3 will enter the first applicable mode for that change. The index also identifies those attachments which contain different changes than those changes made in the Unit 2 Cycle 2 amendment submittal. In addition, those attachments which are not needed for restart of the unit following the refueling outage have been identified.

Enclosed for each of the proposed technical specification changes are the following:

- A. Description of the Technical Specification Amendment Request.
- B. Purpose of the Technical Specification.
- C. Need for the Technical Specification Amendment.
- D. Basis for Proposed No Significant Hazards Consideration Determination.
- E. Safety Analysis for the Amendment Request.
- F. Environmental Impact Consideration Determination.
- G. Marked-up Technical Specification Change Pages.

In addition, a series of bases changes are proposed to update references and make changes to CPC auxiliary trip setpoints that reflect the Cycle 2 reload calculations. These changes are described in Attachment 14 and include a justification for the proposed changes and marked-up technical specification change pages.

By copy of this letter, we are also forwarding the proposed changes to the appropriate state agency.
