Mr. Eugene Dacus
Director, Office of Congressional Affairs
Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Dacus:

Enclosed please find concerns submitted to my office by my constituent, Mr. Jim Hanlon.

Mr. Hanlon has contacted my office for assistance with disposing of tritium signs, which he found at a construction site. Mr. Hanlon states that he has attempted to locate a disposal facility but is being told that he must pay a significant sum of money for this service. At this time, Mr. Hanlon is requesting any information or assistance your office can provide that might allow for this disposal of the signs at no cost to him.

I would greatly appreciate your review of the circumstances involved in this matter and your insights as to efforts that can be taken to address Mr. Hanlon's concerns.

Please feel free to contact Mr. Thomas Kubon, my Congressional Aide, at the Merrillville District office should you have any questions or comments pertaining to this request.

Thank you for your kind attention to this matter.

Sincerely,

Peter J. Visclosky
Member of Congress

Comments:

Mr. Hanlon works construction and he removed some hazardous signs that contain tritium. He has tried to find a place that will recycle them but he only is told to pay hundreds of dollars. He does not want to just throw them in the garbage. Is there any place that will assist in disposing of these signs. He has been in contact with the Nuclear Regulatory Commission but has not received an adequate answer.
