EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)																																																																																																																																																																																																	
02		During refueling calibration of pressurizer pressure transmitters,																																																																																																																																																																																															
03		technician found PT-431 for channel III 2.1% high during the instest																																																																																																																																																																																															
04		(T.S.6.9.2.b.1). Transmitter provides signals for reactor trip logic																																																																																																																																																																																															
05		(Hi and low pressure, and overtemp ΔT) and for the safeguard logic (low																																																																																																																																																																																															
06		pressure). Three redundant channels were found within acceptable tolerances.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)																																																																																																																																																																																																	
10		This error was due to transmitter drift. The transmitter was recalibrated																																																																																																																																																																																															
11		in accordance with plant calibration procedures and returned to service. The																																																																																																																																																																																															
12		transmitter is a Foxboro Model 611GM-DS1.
