Thanks Justin.

I'll let you know as soon as I get these documents in eportal.

-Christine

Subject: Documents requesting to be added to the ASR audit portal.

CAUTION - EXTERNAL EMAIL

As we talked today, as well as at the audit entrance, we would like the following documents to be placed on the portal in support of the ASR audit.

- (1) Provide a numerical example that demonstrates how the 100-40-40 spatial combination method is implemented. We want to see how you came up with the 100-40-40 numbers being used in the CEB calc. During the entrance call it was mentioned that multiple examples (within the CEB calc) would be helpful.
- (2) The following document I believe is reference [1] to the CEB calc:
Simpson Gumpertz & Heger, Inc., Criteria Document for Evaluation and Design Confirmation of As-Deformed Containment Enclosure Building at Seabrook Station in Seabrook, NH, Document No. 150252-CD-03, Revision 0, Waltham, MA, 27 July 2016.
