Donald C. Cook Nuclear Plant Unit No. 1  
Docket No. 50-315  
License DPR No. 58

Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Denton:

This letter serves to request changes in several areas of the Donald C. Cook Nuclear Plant Unit No. 1 Appendix 'A' Technical Specifications. Attachment 'A' to this letter contains the description and review of each change. Attachment 'B' contains a copy of the appropriate revised pages. We would like to point out that a number of these changes are editorial in nature and noted as such. We request that the NRC file and process this technical specification change package as a single amendment.

All of the proposed technical specification changes contained herein have been reviewed and approved by the Plant Nuclear Safety Review Committee (PNSRC) and the AEPSC Nuclear Safety and Design Review Committee (NSDR). The result of these reviews indicates that in no instance will the proposed technical specification change adversely affect the health and safety of the public.

This application for Technical Specification revision is considered to be a Class II License Amendment as per the provisions of 10 CFR 170.22. As required by Part 170 Subsection 22 a check for \$1,200.00 accompanies this submittal.

Very truly yours,

  
G. P. Maloney  
Vice President
