August 27, 1979

Mr. Harold C. Denton, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Denton:

In order to assure continued operation of the Donald C. Cook Plant Unit Numbers 1 and 2 (Docket Nos. 50-315 and 50-316), the Indiana and Michigan Power Company has applied for an operating license amendment for expansion of the spent fuel storage capacity.

The attached letter of May 14, 1979 contained my request for additional information about this project, but no reply has been received. Please forward information sufficient for a technical review of public health matters related to this proposed spent fuel storage capacity expansion, including any pertinent Salem Generating Station, New Jersey data referenced by Indiana and Michigan Company.

Thank you for your cooperation.

Sincerely,

Maurice S. Reizen, M.D.
Director
