1. The first part of the report is a general description of the project and its objectives. It includes a brief history of the project and a statement of the problem to be solved.

2. The second part of the report is a detailed description of the methodology used in the study. It includes a description of the data collection methods, the statistical methods used, and the results of the analysis.

3. The third part of the report is a discussion of the results of the study. It includes a comparison of the results with the objectives of the project and a discussion of the implications of the findings.

4. The fourth part of the report is a conclusion and a list of references. The conclusion summarizes the main findings of the study and the references list the sources of information used in the study.

5. The fifth part of the report is an appendix containing additional information that is not included in the main body of the report. This may include raw data, detailed calculations, or other supporting information.

October 17, 1979

Mr. J.G. Keppler, Regional Director  
Office of Inspection and Enforcement  
United States Nuclear Regulatory Commission  
Region III  
799 Roosevelt Road  
Glen Ellyn, IL 60137

Operating License DPR-74  
Docket No. 50-316

Dear Mr. Keppler:

This is to confirm our verbal report to NRC Region III Inspector, R.E. Masse, at 1010 hours on October 17, 1979.

At that time we reported that emergency power was removed from the Unit 2 Turbine Driven Auxiliary Feed Pump concurrently with the Unit 1 Motor Driven Auxiliary Feed Pump being out of service for routine maintenance. This left only the Unit 2 Motor Driven Auxiliary Feed Pump operable with emergency power for a time period of two hours and forty-five minutes. All normal auxiliary power supplies were available during this time period.

A followup report will be submitted by October 31, 1979, as required by Technical Specification Section 6.9.1.8.

Sincerely,

D.V. Shaller  
Plant Manager
