the 1990s, the number of people in the world who are undernourished has declined from 760 million to 600 million. The number of people who are malnourished has declined from 1.1 billion to 800 million. The number of people who are obese has increased from 100 million to 300 million. The number of people who are overweight has increased from 100 million to 300 million. The number of people who are obese and overweight has increased from 100 million to 300 million. The number of people who are obese and overweight has increased from 100 million to 300 million.

The diagram illustrates the progression from risk factors to clinical outcomes in atherosclerosis. It starts with 'Risk Factors' (Age, Sex, Diet, Lifestyle) which influence 'Pathological Processes' (Endothelial Dysfunction, Inflammation, Lipid Accumulation). These processes lead to 'Clinical Outcomes' (Coronary Artery Disease, Stroke, Peripheral Vascular Disease).

Docket No. 50-315

Dear Mr. Keppler:

This report is submitted as required by Technical Specification 3.3.3.4, as the required Meteorological Monitoring Instrumentation was operating improperly from December 24, 1979, until January 7, 1980.

A Special Report was previously submitted on December 28, 1979, concerning the inoperability of the Meteorological Instrumentation while installing new equipment (copy attached). The installation of the new equipment was completed on December 24, 1979. On January 7, 1980, while experiencing high winds, it was discovered that recorded wind direction was 180° from actual wind direction.

Investigation revealed that during the installation of the new Meteorological Monitoring Instrumentation, the transmitter leads were inadvertently reversed. This resulted in the 180° wind direction error. The discrepancy was corrected on January 7, 1980. All wind directions were recorded between the dates of December 24, 1979, and January 7, 1980. However, the wind direction data for this period was recorded 180° from actual wind direction.

Sincerely,

D.V. Shaller
Plant Manager
