NRC CONFIRMATORY ACTION LETTER OF NOVEMBER 17, 1983

Mr. James G. Keppler
U.S. Nuclear Regulatory Commission
Region III
799 Roosevelt Road
Glen Ellyn, IL 60137

Dear Mr. Keppler:

This letter is in reference to our January 20, 1984 letter (AEP:NRC:0858) which responded to your Confirmatory Action Letter dated November 17, 1983. In order to preclude the possibility of misinterpretation of Section B.2.c, "Review of Tests or Experiments" of our letter, we would like to supply the following additional information:

The term "non-routine tests or experiments" as used in this section means, those tests or experiments conducted on safety related items that are not a part of routine plant operations or surveillance requirements, are not addressed by requirements in the FSAR, or where the Plant Manager and/or the PSNRC cannot make a clear determination as to whether they are within existing Technical Specification or other licensing requirements.

This document has been prepared following Corporate Procedures which incorporate a reasonable set of controls to ensure its accuracy and completeness prior to signature by the undersigned.

Very truly yours,

M. P. Alexich
Vice President
