License Nos. DPR-58 and DPR-74  
June 12, 1984 CONFIRMATORY ORDER - STATUS  
REPORT ON REGULATORY GUIDE 1.97 COMPLIANCE

Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Denton:

This letter is submitted in compliance with your June 12, 1984 Licensing Order to the Donald C. Cook Nuclear Plant Unit Nos. 1 and 2. The Order required us to submit a status report on the Donald C. Cook Nuclear Plant's compliance with Regulatory Guide 1.97 by February 28, 1985.

In our letter to you (AEP:NRC:0773D) dated January 30, 1984, AEPSC committed to submit a status report on how we meet the requirements of Type A, B, C, D, and E variables as described in Regulatory Guide 1.97, Revision 2, for the Donald C. Cook Nuclear Plant Units 1 and 2. The enclosure to this letter contains this report including a schedule for planned instrumentation upgrades.

AEPSC has decided to upgrade the D.C. Cook Nuclear Plant to the requirements of Regulatory Guide 1.97, Revision 3, in order to stay as current as possible with regulatory positions regarding accident and post-accident monitoring. It is believed that this change in commitment is not significant in terms of plant safety due to the small number of differences in actual requirements between Revision 2 and Revision 3.

The current schedule for the D.C. Cook modifications associated with post-accident monitoring is described in the enclosure. We recognize that equipment delivery delays, test difficulties, or other problems may cause delays in this schedule. If these problems should result in a significant change in our overall target date, we will notify you accordingly.

AEPSC has engaged an engineering consulting firm to perform the engineering study to determine Donald C. Cook Nuclear Plant's compliance with Regulatory Guide 1.97. This consultant has not yet issued the final report; therefore, some items in the enclosure may be added, deleted, or otherwise revised. In addition, revisions to the scheduler commitments made herein may be required due to the impact of the Emergency Operating Procedure and DCRDR integration process.
