Donald C. Cook Nuclear Plant Unit Nos. 1 and 2
Docket Nos. 50-315 and 50-316
License Nos. DPR-58 and DPR-74
ADDITIONAL CLARIFICATION OF TECHNICAL SPECIFICATION CHANGE
REQUESTS IN THE AEP:NRC:0659 SERIES

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Denton:

Pursuant to discussions with your staff, this letter and its attachments amend our letter AEP:NRC:0659C, dated December 17, 1984, with regard to Technical Specification (T/S) 6.5.2.6, and provide additional information requested by your staff.

Attachment 1 to this letter contains the reasons and 10 CFR 50.92 (no significant hazards considerations) justification for the proposed T/S changes. Attachment 2 contains the amended T/S pages. Attachment 3 contains the Plant and Corporate organization charts and personal descriptions requested by your Staff. The information in Attachment 3 is not to be considered as part of the Technical Specification submittal.

We believe that the proposed changes will not result in (1) a significant change in the types of effluents or a significant increase in the amounts of any effluent that may be released offsite, and (2) a significant increase in individual or cumulative occupational radiation exposure.

These proposed changes have been reviewed by the Plant Nuclear Safety Review Committee (PNSRC) and will be reviewed by the Nuclear Safety and Design Review Committee (NSDRC) at its next regularly scheduled meeting.

In compliance with the requirements of 10 CFR 50.91(b)(1), copies of this letter and its attachments have been transmitted to Mr. R. C. Callen of the Michigan Public Service Commission and Mr. G. Bruchmann of the Michigan Department of Public Health.

Since the Technical Specification change request contained in this letter is in direct response to concerns raised by your staff that resulted from their review of our letter AEP:NRC:0659C, no additional fee is enclosed.

ATTACHMENT 1 TO AEP:NRC:0659F
REASONS AND 10 CFR 50.92 ANALYSES FOR
CHANGES TO THE
DONALD C. COOK NUCLEAR PLANT UNIT NOS. 1 AND 2
TECHNICAL SPECIFICATIONS

Attachment 1 to AEP:NRC:0659F

The proposed changes to Technical Specification 6.5.2.6 for Unit Nos. 1 and 2 clarify the definition of the word "quorum." Also, a footnote is added to clarify that alternates are not to be regular voting members on the NSDRC. These changes supersede those made to T/S 6.5.2.6 in our letter AEP:NRC:0659C. All other changes on page 6-10 for Unit Nos. 1 and 2 are as requested in that letter. These changes are primarily administrative in nature, and therefore we believe they do not involve a significant hazards consideration as defined by 10 CFR 50.92.

1. *Phragmites australis* (Cav.) Trin. ex Steud.

A black and white photograph showing a wide, open landscape. In the foreground and middle ground, there is a large, flat area that appears to be a field or a beach. It is mostly white with some scattered dark spots, which could be rocks, debris, or small trees. In the background, there is a dense line of trees or a forest. The sky is not clearly visible, appearing as a light, hazy area above the trees.

1. The first group of people who are interested in the study of the history of the United States are the people who are interested in the history of the United States.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were grown in the YEA medium for 24 h at 28°C. The cell concentration of the strains was adjusted to 10⁸ cells/ml. The cell suspension was mixed with the plant tissue and the transformation efficiency was determined. The results were expressed as the mean ± SD of three independent experiments. The asterisks indicate the significant difference between the strains at the same concentration of the cell suspension.
