License Nos. DPR-58 and DPR-74
REQUEST FOR APPROVAL OF CONDUIT SEALING PROGRAM

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

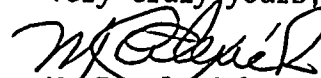

Dear Mr. Denton:

Following conversations with your staff regarding the requirements of Branch Technical Position (BTP) APSCB 9.5-1, Appendix A, Section D.1.J., we wish to formally request approval of our conduit sealing program as described in our letter AEP:NRC:0692AG, dated September 13, 1985 (copy attached). We remain committed to the position and program described in that letter. We stated in that letter that we would conduct a walkdown to identify the conduits which penetrate a fire barrier and which are open at both ends. At this point we have completed this walkdown and have identified open-ended conduits. Although we have officially committed only to add one seal in double-open-ended conduits, we believe it will be more practical in many instances to seal the end of any open-ended conduits identified during the walkdown.

In addition, we are currently involved in a study and testing of conduit configurations to determine the need to internally seal conduit to maintain fire barriers. Although this program was not requested or required by the NRC, we believe it is the best way to determine how conduit sealing should be handled in the future. By July 31, 1986 we will provide you with a proposed schedule for the performance of both the conduit sealing and the study and testing program.

This document has been prepared following Corporate procedures which incorporate a reasonable set of controls to insure its accuracy and completeness prior to signature by the undersigned.

Very truly yours,

M. P. Alexich
Vice President
