ATTN: Mr. A. Bert Davis

This special report is being submitted pursuant to the requirements of Technical Specification 3.7.10 Action (a) to inform you that Fire Door 325 was inoperable in excess of 7 days.

Technical Specification 3.7.10 Action (a) requires that a fire door be returned to service within 7 days or a special report be submitted. On May 5, 1987, at 1400 hours, Fire Door 325 separating the Unit 1 Reactor Cable Tunnel Quadrants 3M and 3S was declared inoperable to facilitate replacement of the fire door. Due to difficulties encountered in replacement of the door, the door was not declared operable until May 12, 1987, at 1634 hours. This exceeds the 7 day requirement by 2 hours and 34 minutes. A fire watch, as required by Technical Specification 3.7.10 Action (a), had been established and was in effect at all times.

Respectfully Yours,

W.G. Smith, Jr.  
Plant Manager
