Attn: T. E. Murley

April 22, 1988

Dear Dr. Murley:

Pursuant to discussions with your staff on April 7, 1988, the purpose of this letter is to request withdrawal of the proposed technical specification (T/S) changes submitted via our letter AEP:NRC:08560 on July 10, 1986.

The changes we requested in our letter AEP:NRC:08560 addressed the control room habitability concerns of NUREG-0737 Item III.D.3.4 and the requirements of Generic Letter 83-37. Subsequent to our submittal of the proposed changes, a team from NRR and Argonne National Laboratory visited the Cook Nuclear Plant for the purpose of reviewing our control room ventilation system. The team's report, which was issued on February 2, 1987, concluded that the T/S change proposed in our letter AEP:NRC:08560, as well as the supporting analyses, may require changes in order to meet the NUREG-0737 requirements.

In our letter AEP:NRC:0398N, dated October 2, 1987, we advised the NRC that we were reanalyzing the areas of concern. As stated in the letter, we anticipate that the reanalysis will be completed by June, 1988. At that time, we plan to propose a schedule for submitting revised T/Ss and performing any necessary modifications to the plant. Since the T/S changes proposed in our letter AEP:NRC:08560 will be superseded by the future submittal, we request that they be withdrawn.
