Donald C. Cook Nuclear Plant Units 1 and 2
Docket Nos. 50-315 and 50-316
License Nos. DPR-58 and DPR-74
RESPONSE TO NRC BULLETIN NO. 88-03
INADEQUATE LATCH ENGAGEMENT IN HFA TYPE LATCHING RELAYS
MANUFACTURED BY GENERAL ELECTRIC (GE) COMPANY

U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D.C. 20555

Attn: T. E. Murley

June 24, 1988

Dear Dr. Murley:

This letter responds to NRC Bulletin No. 88-03, "Inadequate Latch Engagement in HFA Type Latching Relays Manufactured by General Electric (GE) Company." The subject bulletin requests all addressees to respond. We have determined that we do have HFA type latching relays in the balance-of-plant (BOP) application, but our investigation did not disclose any GE manufactured HFA type latching relays in Class 1E applications in either unit of the Cook Nuclear Plant.

Per the NRC's request, we have estimated 24 man hours of staff time required to research this information and to prepare this response.

This document has been prepared following corporate procedures which incorporate a reasonable set of controls to ensure its accuracy and completeness prior to signature by the undersigned.

Sincerely,

A handwritten signature in dark ink, appearing to read 'M. P. Alexich', written over the typed name.

M. P. Alexich
Vice President
