Dated September 26, 1979

Dear Mr. Denton:

This letter is in reference to Condition C.3(a) to the operating license for Unit 2 of the Donald C. Cook Nuclear Plant No. DPR-74. In our above referenced letter we requested an extension to complete the analytical evaluation until September 01, 1980. However, as agreed upon during the meeting between the utility group, Westinghouse and the NRC Staff held on November 28, 1979 we will be sending the final reports on the results of the analytical evaluation on the following revised schedule:

- (1) By January 25, 1980 a complete evaluation will be submitted pertaining to the following items:
 - a. Reactor Vessel Support evaluation for breaks inside the reactor cavity.
 - b. Integrity of the attached ECCS piping systems.
 - c. NSS component support evaluation for primary pipe breaks outside the reactor cavity.
