Washington, D. C. 20555

Reference: License Number SUB-1176

Dear Sir:

Attached please find one copy of the annual statistical report of exposures for the year 1978 as required by 10 CFR 20.407. This report was submitted on 5 March, 1979 and corrected on 21 September, 1979 for the Donald C. Cook Nuclear Plant, Operating Licenses DPR-58 (Unit 1) and DPR-74 (Unit 2).

License Number SUB-1176 had been maintained after the issuance of DPR-58 to permit the receipt of Source Material for Unit 2. The License Number DPR-74 was issued on 23 December, 1977 as which time it was thought that SUB-1176 was cancelled as it was superseded by DPR-74. Since the receipt of the notice of Overdue Personnel Exposure and Monitoring Report, dated 30 November, 1979, we have determined that Source Material License SUB-1176 did not expire until 30 September, 1979.

Inasmuch as it is essentially impossible for us to segregate doses related to SUB-1176 from those incurred under Licenses DPR-58 and DPR-74, we are submitting the same report. We will also submit the report for the entire year 1979 to you as well for the same reason, even though the License will be valid for only a portion of that time.

Sincerely,

D. V. Shaller
