1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the integrity of the financial system and for the ability to detect and prevent fraud.

2. The second part of the document outlines the specific procedures for recording transactions. It details the steps involved in the accounting cycle, from identifying the transaction to posting it to the appropriate ledger account.

3. The third part of the document discusses the role of the auditor in verifying the accuracy of the records. It describes the various techniques used by auditors to test the reliability of the data and to ensure that the financial statements are presented fairly.

4. The fourth part of the document addresses the issue of internal controls. It explains how a well-designed system of internal controls can help to minimize the risk of error and to ensure that the organization's assets are protected.

5. The fifth part of the document discusses the importance of transparency and accountability in financial reporting. It argues that organizations should be open and honest about their financial performance and should provide clear and concise information to their stakeholders.

6. The sixth part of the document discusses the role of the board of directors in overseeing the financial reporting process. It explains that the board has a responsibility to ensure that the financial statements are accurate and that the company is in compliance with all applicable laws and regulations.

7. The seventh part of the document discusses the importance of the external audit. It explains that an independent audit by a qualified firm can provide a high level of assurance that the financial statements are reliable and that the company is operating in accordance with the highest standards of financial reporting.

8. The eighth part of the document discusses the role of the public in financial reporting. It argues that the public has a right to know how the companies they invest in or do business with are performing financially and that this information should be made readily available to them.

9. The ninth part of the document discusses the importance of the financial reporting process in the overall business system. It explains that the financial reporting process is a critical component of the business system and that it plays a key role in the allocation of resources and in the growth of the economy.

10. The tenth part of the document discusses the future of financial reporting. It explores some of the challenges that the financial reporting process will face in the years ahead and offers some suggestions for how these challenges can be addressed.

Glen Ellyn, IL 60137

Operating License DPR-74  
Docket No. 50-316

Dear Mr. Keppler:

This is a follow up to our letter of February 20, 1981 concerning a possible service water leak in a ventilation unit of the lower volume of Unit 2 Containment.

The investigation revealed that the water was not from a service water leak, but from the normal condensation which occurs as the Containment Atmosphere passes over the cooling coils. The drip pan drain had become plugged causing the drip pan to overflow and run into the Pipe Tunnel Sump.

Therefore, in as much as no service water leak exists we are requesting that the notification be withdrawn.

Sincerely,

D. V. Shaller  
Plant Manager
