License Nos. DPR-58 and DPR-74
REACTOR COOLANT VENT SYSTEM
TECHNICAL SPECIFICATION PROPOSAL REVISION

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Denton:

This letter and its attachment respond to Mr. Steven A. Varga's letter dated February 9, 1984. In that letter, Mr. Varga conveyed several concerns that your office had with regard to our proposed technical specifications (T/S) for the Reactor Coolant Vent System which we submitted to you on January 20, 1984 in our letter No. AEP:NRC:0584B. Having considered these concerns, we are now submitting to you our revised proposed T/S for the Reactor Coolant Vent System. The attachment to this letter contains the proposed new specifications for Unit Nos. 1 and 2 of the Donald C. Cook Nuclear Plant.

It is our belief that the justification for significant hazards considerations that was provided in our letter No. AEP:NRC:0584B is still applicable. In addition, we interpret that the fee transmitted with our letter No. AEP:NRC:0584B covers the processing of this request.

These proposed changes have been reviewed by the Plant Nuclear Safety Review Committee (PNSRC) and will be reviewed by the Nuclear Safety and Design Review Committee (NSDR) at its next regularly scheduled meeting.

In compliance with the requirements of 10 CFR 50.91 (b)(1), a copy of this letter and its attachments have been transmitted to Mr. R. C. Callen of the Michigan Public Service Commission.

Although the equipment to assure compliance with these T/S is installed at the Plant, we request that we be allowed an implementation period of 45 days following the issuance of the T/S to accommodate the time required for writing plant operating procedures and the associated training in the use of the procedures.
