NUREG-0737, SUPPLEMENT 1 EMERGENCY
RESPONSE FACILITY (ERF) UPDATE

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Denton:

In response to the request of your staff, this letter is to summarize the status of the D. C. Cook Plant in regard to NUREG-0737, Item III.A.1.2 and Supplement 1 to NUREG-0737, Item 8, Emergency Response Facilities (ERF).

We believe the D. C. Cook Plant Technical Support Center (TSC), Operations Staging Area (OSA), and the Emergency Operations Facility (EOF), are complete and operational with the following exceptions which are currently undergoing active regulatory review.

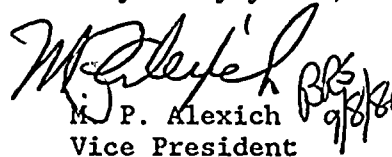

- (1) (NUREG-0737, Item I.D.2) The plant's Safety Parameter Display System (SPDS) and the problems discussed with your staff and outlined in Generic Letter 86-10.
- (2) (NUREG-0737, Item III.A.2.2) The source of meteorological data available in the TSC and the EOF is being extensively reviewed in response to your request of June 18, 1986 by the NRC and AEP to determine the adequacy of the meteorological tower.
- (3) (NUREG-0737, Items II.B.3 and II.F.1) The radiological post-accident sampling and accident monitoring systems which are undergoing extensive reviews for compliance with both NUREG-0737 and R.G. 1.97 criteria pursuant to the requests of both your staff and members of the NRC Inspection and Enforcement staff.
- (4) Other changes that may be required as a result of our Detailed Control Room Design Reviews.
