ERECTION AND INSTALLATION OF THE NEW AND MODIFIED
SINGLE-FAILURE-PROOF AUXILIARY BUILDING CRANES

U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D.C. 20555

Attn: T. E. Murley

January 21, 1988

Dear Dr. Murley:

As we have discussed with members of your staff we are in the process of completing a 10CFR50.59 review on the erection and installation of the new and modified single-failure-proof auxiliary building cranes. Upon completion of our review and if no unreviewed safety questions exist we are planning to begin erection and installation of the two cranes.

Both cranes, as described in the Donald C. Cook Nuclear Plant Steam Generator Repair Report, are required for use during the steam generator repair project. Operation of the new or modified crane except in connection with the erection and installation is contingent upon your review and approval of our previously submitted Steam Generator Repair Report.

The 10CFR50.59 review will be completed by February 1, 1988, with erection and installation of the cranes scheduled to begin February 15, 1988 as required to support our steam generator repair project schedule. You or members of your staff are invited to review our 10CFR50.59 review and associated documentation.
