NUREG 0737 TMI ACTION PLAN REQUIREMENTS STATUS

U. S. Nuclear Regulatory Commission
Document Control Desk
Washington, D. C. 20555

Attn: T. E. Murley

April 17, 1989

Dear Dr. Murley:

This letter responds to your request for a review and status report on the NUREG 0737 TMI Action Plan Requirements. The attachment to this letter is the NUREG 0737 list you provided annotated with our implementation status.

In responding to your request we have identified, by "*", several items that were closed by NRR and later reopened by NRC Region III. For example, we received a Safety Evaluation Report (SER) on Item III.D.3.4.1 Control Room Habitability dated February 11, 1982. Later, during a Region III inspection, the inspector apparently disagreed with the SER and reopened Item III.D.3.4.1. We are currently responding to those concerns. We believe that all TMI training requirements, Items I.A.1.1.3, I.A.1.1.4, I.A.2.1.1 thru I.A.2.1.1.5, I.A.2.3, I.A.3.1.1, I.A.3.1.2., should be considered closed based on our extensive efforts to successfully obtain INPO accreditation on all Cook Plant Nuclear Training Programs. Items I.A.3.1.3 A and B should also be closed because we have purchased, installed, and are currently training on a Cook Nuclear Plant specific simulator.

Please be advised that the attached responses were prepared on extremely short notice. The responses are therefore only accurate to the best of our knowledge based on our ability to perform a limited records search in the short time available and are limited to the material provided to us in your letter. We do not certify to the full and complete accuracy of our responses and we reserve the right to amend our responses if further review merits such action.
