

NUCLEAR WASTE COMMITTEE OF OHIO AND INDIANA, INC.

Post Office Box 934, Fremont, Indiana 46737

November 25, 1989

Nuclear Regulatory Comm.
Division of Waste Management
Office of Nuclear Material Safety & Standards
1717 H Street N.W.
Washington, D. C. 20555

Our organization was established in August, 1988, and is very concerned with the proper repositing of low-level radioactive nuclear waste. Since the State of Michigan is currently studying three areas of the state for the establishment of such a repository we have done extensive studies and research and we have discovered that the steam generators of one unit of the Donald C. Cook plant at Bridgman, Michigan, are being replaced. We have also been informed that the generators, being highly radioactive, are being stored on site in concrete bunkers, uncovered, and that the NRC approved this method of storage.

Please explain to us on what grounds you can approve an uncovered storage of such highly radioactive material. Awaiting a reply,

Respectfully,

NWCOI
