Attn: T. E. Murley

December 17, 1991

Dear Dr. Murley:

This letter is written to advise you that, as of November 19, 1991, we have implemented a permanent procedure for loss of RHR based on the Abnormal Response Guidelines and Background Document from the Westinghouse Owners Group (WOG). The implementation of this new procedure is a result of our commitment to make programmatic enhancements in response to Generic Letter 88-17, "Loss of Decay Heat Removal."

In our letter AEP:NRC:1033C, dated February 6, 1989, we estimated that this new procedure would be issued in approximately mid-February 1990. However, as explained in AEP:NRC:1033H dated June 20, 1991, the WOG guidance was not provided until March 1990. Between March 1990 and February 1991, we conducted a review of this generic guidance to address Cook Nuclear Plant site-specific issues. Subsequently, a site-specific procedure was written and approved, the operators were trained, and the procedure was issued.

This document has been prepared following Corporate procedures that incorporate a reasonable set of controls to ensure its accuracy and completeness prior to signature by the undersigned.

Sincerely,

E. E. Fitzpatrick
Vice President
