Donald C. Cook Nuclear Plant Units 1 and 2
Docket Nos. 50-315 and 50-316
License Nos. DPR-58 and DPR-74
PROPOSED REVISION TO THE 1991 UPDATED
QUALITY ASSURANCE PROGRAM DESCRIPTION (QAPD)

U. S. Nuclear Regulatory Commission
Document Control Desk
Washington, D.C. 20555

Attn: T. E. Murley

April 21, 1992

Dear Dr. Murley:

This letter and its attachments constitute a proposed revision to the 1991 Updated Quality Assurance Program Description (QAPD).

Most of the proposed changes are a result of a reorganization that consolidates the engineering and design activities under my authority. We believe the reorganization provides a more unified focus on the priorities associated with the Cook Nuclear Plant.

We believe that only one of the proposed changes constitute a reduction in previous QA program commitments. In Section 1.7.7.2.7, the PNSRC's and Plant Manager's reviews of contractor procedures have been deleted to be consistent with Technical Specification 6.5.1.6. Technical Specification 6.5.1.6 was previously approved by the Nuclear Regulatory Commission (Amendments 138 for Unit 1 and 125 for Unit 2, dated May 23, 1990). Similarly, clarifications are proposed for Sections 1.7.2.2.4 and 1.7.3.2.2.

Attachment 1 to this letter addresses each of the specific changes (other than the general repagination). The proposed changes can readily be identified by the highlighting in Attachment 2, which is the proposed QAPD.

As provided by 10 CFR 50.54(a)(iv), the proposed changes shall be regarded as accepted by the Commission upon receipt of a letter to this effect, or 60 days after submittal, unless otherwise notified by the Commission.

This document has been prepared following Corporate procedures that incorporate a reasonable set of controls to ensure its accuracy and completeness prior to signature by the undersigned.

Sincerely,

E. E. Fitzpatrick
Vice President
Nuclear Operations
