RE: Docket No. 50-315 and 50-316
License No. DPR-58 and DPR-74

Dear Mr. Collins:

In accordance with Mr. Eisenhower's letter of August 7, 1981 (Generic Letter 81-29), I am forwarding you the following schedule of examinations for the remainder of calendar year 1981 and for 1982.

I'm aware from our telephone conversation that you requested I send this information to Mr. McMillan in Region III. However, as directed in Mr. Eisenhower's letter, I'm forwarding this information to you with a copy to Mr. McMillan.

The following information is not firm on license dates and simulator examination dates at this time; these are only estimates. As in the past, tentative scheduling of examinations is done with your examiners and myself up to approximately a year in advance. Examination schedule dates and the number of personnel for the examinations is scheduled approximately three months prior to the examination dates. If you require more exact scheduling earlier than this, I can attempt it, but due to plant work load and NRC examiner work loads, this has been felt to be fruitless.

Examinations scheduled for the remainder of this year (1981) are as follows:

9-11 people will be taking the Reactor Operator examination.

4-6 Reactor Operators will be taking the Senior Reactor Operator examination.

Written and oral examinations are scheduled for the week of December 14, 1981.

Simulator examinations are scheduled for December 21, 22, and 23, 1981, using the Westinghouse SNUPPS simulator located in & INCH. POWER CO. Zion, Illinois.

September 16, 1981

Tentative schedules of examinations for 1982 are as follows:

4-6 Reactor Operators will be taking the Senior Reactor Operator examinations approximately the week of April 26, 1982 (written and oral).

Simulator examinations are tentatively scheduled for May 3 through May 7, 1982, using the Westinghouse SNUPPS simulator.

10-12 people will be taking the Reactor Operator examinations and

4-6 Reactor Operators will be taking the Senior Reactor Operator examinations approximately the week of December 13 (written and orals).

Simulator examinations for these groups are tentatively scheduled for December 18 through December 22, 1982, using the Westinghouse SNUPPS simulator.

Again, let me reiterate that this is only a tentative schedule, not exact or firm. Examination dates will be worked out between the NRC examiners and myself enough in advance for exact planning.

DAVID D. NELSON, Training Coordinator
