Gentlemen:

Donald C. Cook Nuclear Plant Units 1 and 2
PROPOSED TECHNICAL SPECIFICATION
AMENDMENT TO ALLOW FUEL RECONSTITUTION
(GENERIC LETTER 90-02 SUPPLEMENT 1)
REQUEST FOR ADDITIONAL INFORMATION

This letter is in response to the changes to submittal AEP:NRC:1124B discussed on June 20, 1995. As agreed upon, the following statement has been incorporated into the wording for the proposed change to technical specification (T/S) Section 5.3.1.

"Fuel assemblies shall be limited to those fuel designs that have been analyzed with applicable NRC staff-approved codes and methods, and shown by tests or analyses to comply with all fuel safety design bases. A limited number of lead test assemblies that have not completed representative testing may be placed in non-limiting core regions."

The attachment contains the revised page for each unit.

These proposed T/S changes have been reviewed and approved by the Plant Nuclear Safety Review Committee and will be reviewed at the next regular meeting of the Nuclear Safety and Design Review Committee.
