FILE *for only*

Dear Mr. Miller:

Enclosed is a copy of the corrected final report for the May 9, 1995, plume exposure pathway exercise of the offsite radiological emergency response plans, site-specific to the Donald C. Cook Nuclear Power Station. An additional review of the report was conducted and regrettably errors were found on page 10, "Table 2: Summary Results of Exercise Evaluation" and page 14, the "State of Michigan" results section. We apologize for this mistake. Please destroy your copy of the report dated September 6, 1995 and retain the enclosed corrected copy dated December 13, 1995. Corrected copies of this report have been provided to the State of Michigan and our National Office.

Reference our September 18, 1995 letter, the Title 44 CFR, Part 350, approval of the offsite radiological emergency response plans and preparedness for the State of Michigan, site-specific to the Donald C. Cook Nuclear Power Station, granted on September 28, 1983, will remain in effect.

We apologize for any inconvenience this may have caused you. Please contact Clara Gatewood-Brown at (312) 408-5322 if you have any questions.

Sincerely,

Michelle M. Burkett
Michelle M. Burkett
Regional Director
