50-316

U.S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Mail Stop O-P1-17
Washington, D.C. 20555-0001

Gentlemen:

Donald C. Cook Nuclear Plant Units 1 and 2
REQUEST TO EXTEND IMPLEMENTATION DATE
FOR TECHNICAL SPECIFICATION AMENDMENTS 216 AND 200

Reference:

Letter, John B. Hickman to E. E. Fitzpatrick, "Donald
C. Cook Nuclear Plant Units 1 and 2, ISSUANCE OF
AMENDMENTS RE: BORIC ACID CONCENTRATION REDUCTION (TAC
NOS. M94940 AND M94941)", dated August 7, 1997.

The referenced letter transmitted unit 1 technical specification
(T/S) amendment 216 and unit 2 T/S amendment 200. The amendments
for both units increase the minimum borated water volume in the
boric acid storage system and decrease the required boron
concentration. These amendments were to be implemented when
required plant modifications were completed, but no later than
August 31, 1998.

Because of outage related activities, the required system
modifications will not be completed by August 31, 1998. Therefore,
it will not be possible to implement the T/S amendments by that
date. We request that the implementation date be extended to
December 31, 1999.

Sincerely,

E. E. Fitzpatrick
Vice President
