Gentlemen:

Donald C. Cook Nuclear Plant Units 1 and 2
1997 ANNUAL OPERATING REPORT

Paragraph 6.9.1.5 of the Cook Nuclear Plant technical specifications requires that an annual report be submitted to address personnel exposure, steam generator in-service inspection results, challenges to power-operated relief and safety valves, and information regarding I-131 reactor coolant activity. In addition, 10 CFR 50.59(b)(2) requires submittal of an annual report describing changes, tests, and experiments made in the preceding year. Consistent with these requirements, a copy of the 1997 annual operating report is contained in attachment 1 to this letter. Attachment 2 contains the steam generator inspection indication listing for units 1 and 2.

Sincerely,

J. R. Sampson
Vice President
