To the US NRC and Research Reactor Community:

The entire Purdue University reactor personnel would like to express their sincerest condolences on the news of the passing of Mike Morlang. Mike's work at the commission as a reactor inspector and operator license examiner was performed diligently and with the greatest of care. He worked hard to ensure universities such as Purdue were able to fulfill their mission while maintaining a safe and secure operational portfolio. Leveraging his experience from the Navy, his passion for nuclear energy was on clear display. Mike will be sorely missed among the Test, Research, and Teaching Reactor Community.

Most Sincerely,

Scungjin Kim
