9a. Ultimate End Use

The final end-use of nuclear material sent to European enrichment facilities will be nuclear fuel loaded and consumed at nuclear power plants, owned or operated by utility customers. Nuclear material may also be sent to a U.S. or European fabricator for manufacturing into fuel rods.

11. Foreign Obligations (best estimate at time of application submittal)

Country obligations shipped by ConverDyn are determined by utility customers and are based on obligations of Uranium Concentrates (U3O8) the utility customers purchase for conversion to Uranium Hexafluoride (UF6). Historically, ConverDyn has shipped approximately 25% Australian-obligated material and 15% Canadian-obligated material to EURATOM facilities.
