EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

02 During routine startup operation, charging system performance was noted to
03 be degraded. During operation (pursuant to TS 3.6.d) the cause of the
04 problem was determined to be air inleakage into the charging pump suction
05 header. The pumps were alternately vented and the cause of the air
06 inleakage was corrected. TS 3.6.c.1 could not be met for 1 1/4 hrs.
07 Alternate boration paths remained available during this occurrence.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

10 The root cause of the air inleakage was a ruptured diaphragm in conjunction
11 with a damaged "O"-ring on valve FCV-3-113B. This valve is in the flow
12 path between the boric acid blender and the charging pump suction header.
13 The valve was repaired and the pumps were vented.
